

Water Distribution & Wastewater Collection Engineering

Rapid technological and regulatory changes are impacting the field of water and wastewater engineering. HMI Technical Solutions (HMITS) integrates engineering expertise with a deep understanding of the permit requirements and approval process. The firm delivers a full spectrum of services for the development and upgrade of water distribution and wastewater collection systems.

HMITS offers reliable and responsive services for all stages of water and wastewater projects, including evaluation, feasibility, and analysis; federal, state, and local permitting; regulatory program compliance and documentation; engineering and detailed system design; and complete project management. The firm develops and delivers interdisciplinary water infrastructure solutions for municipalities, public utilities, and private developers while meeting environmental protection and sustainability standards.

HMITS designs and oversees comprehensive, customized solutions for water distribution, disposal of wastewater, storm drainage, wastewater collection, flood prevention, and corrosion control. The firm's experienced team offers innovative approaches that provide the highest value solutions to even the most complex water and wastewater issues.

Services

- Right-of-Way (ROW) Acquisition
- GIS Mapping
- Subsurface Utility Investigations
- Permitting
- Storm Water Management
- Water Distribution
- Wastewater Collection
- Force Main
- Corrosion Protection
- Pump Station Engineering
- Civil and Geotechnical Engineering
- Material Procurement, Coordination, and Management
- Enterprise Asset Management

Commitment to Safety

HMI Technical Solutions (HMITS) extends safety to every aspect of work. Safety drives the development of impeccable work practices and is at the core of the way behavior is observed, communicated, and investigated. HMITS follows a daily safety management system of leading and lagging indicators, including coaching observation trends, work site audits, good catch and near miss reports, corrective action follow-ups, total recordable incident rates, days away, and restricted duty and transfers. With these indicators, HMITS performs trend analysis and program validation of safety performance. This vigilant evaluation and implementation of company and industry-wide best practices make certain HMITS maintains the absolute highest safety standards to protect our workers, our clients, and the community. HMITS' daily mission is to ensure "Nobody Gets Hurt!"

About

HMITS provides results-driven engineering, design, and integrated solutions to the power, oil & gas distribution, and communications industries. HMITS' best-in-class services include design, asset integrity management, feasibility studies, surveys, constructability reviews, and turnkey delivery services within these core utility segments. With a genesis in construction and a skilled team of multidiscipline engineers and project management professionals, the privately held firm brings a deep understanding of infrastructure to every project.
