

Regulatory Compliance Support

Keeping up with pipeline regulations that are complex and frequently changing can strain a company's capabilities and resources. HMI Technical Solutions (HMITS) provides a wide range of intelligent, cost-effective regulatory compliance support services that assist and protect pipeline businesses, reduce risks, and confidently alleviate regulatory concerns.

HMITS not only understands state and federal regulations, but the engineering and reasoning behind the rules. The firm delivers expert analysis and professional guidance to identify concerns, prevent issues, interpret regulatory changes, and assess the impact of evolving trends. HMITS can also act as a regulatory agency liaison to smoothly handle the compliance process.

With a deep knowledge of the industry and an expert understanding of regulations, HMITS' compliance support professionals deliver tailored solutions for each company's specific needs. The firm provides compliance support in a variety of settings—informative and engaging records review workshops in informal settings; pre-audit preparation sessions for state or federal inspections in semi-formal settings; and on-site support services during audits with regulatory authorities.

HMITS navigates the entire regulatory process, saving companies time, money, and stress. From developing or revising procedures to implementing audit requirements, HMITS has the skills to eliminate gaps and ensure an operator's continued compliance with federal and/or state pipeline safety regulations. HMITS provides peace of mind to keep businesses in compliance and running efficiently, safely, and properly—without interruptions.

- Representation During Audits

Commitment to Safety

HMI Technical Solutions (HMITS) extends safety to every aspect of work. Safety drives the development of impeccable work practices and is at the core of the way behavior is observed, communicated, and investigated. HMITS follows a daily safety management system of leading and lagging indicators, including coaching observation trends, work site audits, good catch and near miss reports, corrective action follow-ups, total recordable incident rates, days away, and restricted duty and transfers. With these indicators, HMITS performs trend analysis and program validation of safety performance. This vigilant evaluation and implementation of company and industry-wide best practices ensures HMITS maintains the absolute highest safety standards to protect our workers, our clients, and the community. HMITS' daily mission is to ensure "Nobody Gets Hurt!"

About

HMITS provides results-driven engineering, design, and integrated solutions to the power, oil & gas distribution, and communications industries. HMITS' best-in-class services include design, asset integrity management, feasibility studies, surveys, constructability reviews, and turnkey delivery services within these core utility segments. With a genesis in construction and a skilled team of multidiscipline engineers and project management professionals, the privately-held firm brings a deep understanding of infrastructure to every project.
